

THIAGO DA CRUZ JUSTO

Cloud Solutions Architect

+34666386103 @thagocruz@gmail.com [Linkedin](#) Madrid, Spain

EDUCATION

Postgraduate in Cloud Computing
Descomplica

Bachelor's degree in Computer Science
UNIP

Computer Technician High School
Colégio Luso Carioca

CERTIFICATIONS

Microsoft Azure Certifications

Azure DevOps Engineer Expert
Azure Solutions Architect Expert
Azure Cybersecurity Architect Expert. Azure
Network Engineer Associate
Azure Developer Associate
Azure Administrator Associate
Azure Security Engineer Associate
Azure Fundamentals

GitHub

GitHub Actions (GH-200)
GitHub Copilot (GH-300)

HashiCorp

Terraform Associate Certificate

AWS Cloud Certifications

AWS Certified DevOps Engineer
AWS Cloud Practitioner

Linux Foundation

Certified Kubernetes Administrator (CKA)

LANGUAGES

Portuguese Native ●●●●●

English Advanced ●●●●●

Spanish Advanced ●●●●●

German Intermediate ●●●●●

ADDITIONAL SKILLS

Azure AWS OpenAI

Monitoring Terraform Security

CI/CD Agile Kubernetes

Docker Network Linux

EXPERIENCE

Cloud Solutions Architect

Microsoft

10/2025 - Present Remote

- Partner with customers to translate business priorities into secure, scalable Azure and GenAI architecture, guiding decisions with a strong focus on outcome
- Designed and validated AI-ready cloud foundations (networking, identity, compute, data platforms) to support LLM-based and search-augmented AI workloads at scale.
- Guided customers from GenAI experimentation to production, aligning Azure OpenAI / Azure AI services with governance, security, and real operational use cases.
- Defined architectural patterns for AI solutions, embedding Zero Trust, compliance, cost controls, and resilience for mission-critical and regulated environments.
- Led technical workshops, architecture reviews, and pilots for AI initiatives, aligning stakeholders and shaping multi-year AI and cloud strategies

Senior Cloud Platform Engineer

Fueled

02/2023 - 09/2025 Remote

- Lead Engineer for managing, building, and defining the infrastructure (ARM, CloudFormation, Terraform) and architecture (DDD, Microservices and Kubernetes) in multiple zones for 500k+ users
- Built and evaluated GenAI and automation PoCs using Copilot, n8n, and AI-assisted workflows, focusing on real operational and developer productivity gains
- Improving client/developers reliability with CI/CD pipelines reducing delivery time by 80%
- Applied data-driven cost optimization to cloud platforms, achieving 65% reduction in operational expenses, including AI and compute-heavy workloads
- Improve application observability/alerts using tools as Azure Monitor, AWS CloudWatch, Prometheus, and Grafana
- Strengthened cloud security posture by 40%, embedding Defender for Cloud, Entra ID, policies, and guardrails aligned with governance requirements

Cloud Engineer

Pwc

01/2022 - 01/2023 Remote

- Key person for infrastructure/Architecture definitions to improve the automation with Terraform for all leading cloud providers (AWS, GCP and Azure) and Kubernetes, enabling consistent foundations for AI and data workloads
- Improved cloud cost efficiency by 15%, applying optimization strategies relevant to compute and data-intensive AI services
- Improved system reliability by 30%, leading to enhanced developer's satisfaction with CI/CD pipelines
- Enhanced security standards by 40% by introducing automated security compliance/governance checks with Microsoft Defender for Cloud

Senior Software Engineer

XP Investimentos (Xp Inc.)

10/2020 - 10/2021 Remote

- Developing solutions focused on the Digital Account area for 300k+ users
- Directly involved in daily refinements to implement the Digital Bank projects
- Focused on the Backend with .Net (APIs, Azure Functions, and microservices architecture)
- Consistently applying the DevOps culture, developing CI/CD pipelines for containerized microservices orchestrated by Azure Kubernetes Service

Software Developer

Stone

02/2020 - 10/2021 Rio de Janeiro - Brazil

- Increased loan processing speed by 30% by implementing agile data-driven solutions for personal and corporate loans
- Improved system latency performance by 50% and 99.99% uptime by implementing .Net standards with Azure FrontDoor, Azure Cache for Redis and Azure Cosmos DB cross-region databases
- Improve the metrics with Azure Monitor, Prometheus and Grafana
- Reduced software delivery time by 30% by automating routine tasks and implementing CI/CD pipelines

INTERESTS

Cloud and Infrastructure

Stoicism and other types of philosophy

MY LIFE PHILOSOPHY

"You have power over your mind—not outside events. Realize this, and you will find strength."

Marcus Aurelius

EXPERIENCE

Software Developer

BTG Pactual

07/2019 - 12/2019 Rio de Janeiro - Brazil

- Development of solutions aimed at the Financial Market assets for 360k+ users.
- Worked on refactoring VB applications to .Net core improving the speed in 70% after move for APIs and optimizing databases.
- Cloud/DevOps technologies: AWS, Terraform, pipelines (CI/CD) on Azure DevOps, and Docker
- Achieved 50% increase in deployment efficiency by implementing DevOps/Cloud best practices.

Software Developer

Unisys

03/2017 - 06/2019 Rio de Janeiro - Brazil

- Developed and refactored company intranet (.NET 3.5 to 4.5) implemented new features with Identity to improve the security and resolving bugs providing application support
- Improved deployment efficiency and reliability by 100% by moving from FTP to CI/CD pipelines using Azure DevOps
- Achieved reduction in technical debt by refactoring legacy code and improving system architecture

Associate Software Developer

Totvs

04/2016 - 03/2017 Rio de Janeiro - Brazil

- Developed APIs and documentation for new developers in the e-commerce context engaged in agile methodologies
- Enhanced cloud efficiency cost reduction by integrating Azure, .Net, and SQL Server (Moving on-premise to Azure Cloud)
- Implemented Azure Services and pipelines (CI/CD) on Azure DevOps

Technical Consultant

Samsung

04/2014 - 04/2016 Rio de Janeiro - Brazil

- Improved customer satisfaction by 20% through targeted profiling and demand identification
- Increased sales by providing targeted consulting and tailored product recommendations after thorough diagnosis
- Demonstrated problem-solving skills as a Technical Consultant at Samsung
- Performed software repair and minor hardware repairs
- Provided technical support
- Managed conflicts between customers returning with devices still having problems
- Supported GVS systems and other systems from Samsung Customer Service

STRENGTHS

Efficiency in pipelines

Proven track record reducing deployment time by 80%.

Cost optimization

Reduced operational expenses by 65% through data-driven decisions.

Cloud platform expertise

Experience with Azure, AWS, and cloud tools management.

Agile methodologies adept

Participated in Agile methodologies to enhance team productivity.
